APPLIED CATALYSIS A: GENERAL

Author Index

Abbot, J., see Guerzoni, F.N. 41
Aguilar-Ríos, G., Valenzuela, M., Salas, P., Armendáriz, H., Bosch, P., Del Toro, G., Silva, R., Bertín, V., Castillo, S., Ramírez-Solís, A. and Schifter, I.
Hydrogen interactions and catalytic properties of platinum–tin supported on zinc aluminate 65
Armendáriz, H., see Aguilar-Ríos, G. 65
Arutyunov, V.S., see Vedeneev, V.I. 51
Audisio, G., see Carniti, P. 139
Baerns, M., see Maiti, G.C. 219
Basevich, V.Ya., see Vedeneev, V.I. 51
Behbehani, M.H., see Caceres, P.G. 107
Beltrame, P.L., see Carniti, P. 139
Bertín, V., see Aguilar-Ríos, G. 65
Bertini, F., see Carniti, P. 139
Besson, M., see Garcia, R. 165
Bosch, P., see Aguilar-Ríos, G. 65
Caceres, P.G. and Behbehani, M.H.
Characterization of promoted magnetite using analytical electron microscopy techniques 107
Cardoso, D., see Sobrinho, E.V. 157
Carniti, P., Gervasini, A., Beltrame, P.L., Audisio, G. and Bertini, F.
Polystyrene thermodegradation. III. Effect of acidic catalysts on radical formation and volatile product distribution 139
Castillo, S., see Aguilar-Ríos, G. 65
Cornaglia, L.M. and Lombardo, E.A.
XPS studies of the surface oxidation states on vanadium–phosphorus–oxygen (VPO) equilibrated catalysts 125
Cortés Corberán, V., see Mamedov, E.A. 1
Del Toro, G., see Aguilar-Ríos, G. 65
Falabella S-Aguiar, E., see Sobrinho, E.V. 157
Freire, F., see Martin-Aranda, R.M. 201
Fujimoto, K., see Yang, M.-G. 115
Gallezot, P., see Garcia, R. 165
Garcia, R., Besson, M. and Gallezot, P.
Chemoselective catalytic oxidation of glycerol with air on platinum metals 165
Gervasini, A., see Carniti, P. 139
Goldenberg, M.Ya., see Vedeneev, V.I. 51
Guerzoni, F.N. and Abbot, J.
Catalytic cracking of a Gippsland reduced crude on a rare earth exchanged ultrastable Y zeolite 41
Haruta, M., see Sakurai, H. 93
Hightower, J.W., see Sarkany, A. 77
Hudgins, R.R., see Saleh-Alhamed, Y.A. 177
Krylov, O.V., see Vedeneev, V.I. 51
Lombardo, E.A., see Cornaglia, L.M. 125
Madeira, L.M., see Martin-Aranda, R.M. 201
Maiti, G.C. and Baerns, M.
Dehydration of sodium hydroxide and lithium hydroxide dispersed over calcium oxide catalysts for the oxidative coupling of methane 219
Mamedov, E.A. and Cortés Corberán, V.
Oxidative dehydrogenation of lower alkanes on vanadium oxide-based catalysts. The present state of the art and outlooks 1
Martin-Aranda, R.M., Portela, M.F., Madeira, L.M., Freire, F. and Oliveira, M.
Effect of alkali metal promoters on nickel molybdate catalysts and its relevance to the selective oxidation of butane 201
Nakamura, I., see Yang, M.-G. 115
Oliveira, M., see Martin-Aranda, R.M. 201
Portela, M.F., see Martin-Aranda, R.M. 201
Ramírez-Solís, A., see Aguilar-Ríos, G. 65
Sakurai, H. and Haruta, M.
Carbon dioxide and carbon monoxide hydrogenation over gold supported on titanium, iron, and zinc oxides 93
Salas, P., see Aguilar-Ríos, G. 65
Saleh-Alhamed, Y.A., Hudgins, R.R. and Silveston, P.L.
Investigations of catalytic mechanisms for selective propene oxidation in the presence of steam 177
Sarkany, A., Stefler, G. and Hightower, J.W.
Participation of support sites in hydrogenation of 1,3-butadiene over Pt/Al_2O_3 catalysts 77
Schifter, I., see Aguilar-Ríos, G. 65
Silva, J.G., see Sobrinho, E.V. 157
Silva, R., see Aguilar-Ríos, G. 65
Silveston, P.L., see Saleh-Alhamed, Y.A. 177

Sobrinho, E.V., Cardoso, D., Falabella S-Aguiar, E. and Silva, J.G.
Disproportionation of ethylbenzene over deeply dealuminated Y zeolites 157
Stefler, G., see Sarkany, A. 77
Teitel boim, M.A., see Vedeneev, V.I. 51
Valenzuela, M., see Aguilar-Ríos, G. 65
Vedeneev, V.I., Krylov, O.V., Arutyunov, V.S., Basevich, V.Ya., Goldenberg, M.Ya. and Teitel boim, M.A.
The role of initiation in oxidative coupling of methane 51
Yang, M.-G., Nakamura, I. and Fujimoto, K.
Toluene disproportionation over NiS/SiO_2–USY hybrid catalysts Effects of spilt-over hydrogen 115

Applied Catalysis A: General 127 (1995) 235–237

APPLIED CATALYSIS A: GENERAL

Subject Index

Acid catalysts
Polystyrene thermodegradation. III. Effect of acidic catalysts on radical formation and volatile product distribution 139
Active site
Oxidative dehydrogenation of lower alkanes on vanadium oxide-based catalysts. The present state of the art and outlooks 1
Alkali promoters
Effect of alkali metal promoters on nickel molybdate catalysts and its relevance to the selective oxidation of butane 201
Alkane
Oxidative dehydrogenation of lower alkanes on vanadium oxide-based catalysts. The present state of the art and outlooks 1
1,3-Butadiene
Participation of support sites in hydrogenation of 1,3-butadiene over Pt/Al_2O_3 catalysts 77
Butane
Effect of alkali metal promoters on nickel molybdate catalysts and its relevance to the selective oxidation of butane 201
Butane oxidation
XPS studies of the surface oxidation states on vanadium–phosphorus–oxygen (VPO) equilibrated catalysts 125
Carbon dioxide
Carbon dioxide and carbon monoxide hydrogenation over gold supported on titanium, iron, and zinc oxides 93
Carbon monoxide
Carbon dioxide and carbon monoxide hydrogenation over gold supported on titanium, iron, and zinc oxides 93
Coke
Toluene disproportionation over NiS/SiO_2–USY hybrid catalysts Effects of spilt-over hydrogen 115
Cracking
Catalytic cracking of a Gippsland reduced crude on a rare earth exchanged ultrastable Y zeolite 41
Dealumination
Disproportionation of ethylbenzene over deeply dealuminated Y zeolites 157
Degradation
Polystyrene thermodegradation. III. Effect of acidic catalysts on radical formation and volatile product distribution 139
Dehydrogenation
Hydrogen interactions and catalytic properties of platinum–tin supported on zinc aluminate 65
Effect of alkali metal promoters on nickel molybdate catalysts and its relevance to the selective oxidation of butane 201
Differential thermal analysis
Dehydration of sodium hydroxide and lithium hydroxide dispersed over calcium oxide catalysts for the oxidative coupling of methane 219
Dihydroxyacetone
Chemoselective catalytic oxidation of glycerol with air on platinum metals 165
Disproportionation
Disproportionation of ethylbenzene over deeply dealuminated Y zeolites 157
Electron microscopy
Characterization of promoted magnetite using analytical electron microscopy techniques 107
Ethylbenzene
Disproportionation of ethylbenzene over deeply dealuminated Y zeolites 157
Gasoline
Catalytic cracking of a Gippsland reduced crude on a rare earth exchanged ultrastable Y zeolite 41
Glyceric acid
Chemoselective catalytic oxidation of glycerol with air on platinum metals 165
Glycerol
Chemoselective catalytic oxidation of glycerol with air on platinum metals 165
Gold catalysts
Carbon dioxide and carbon monoxide hydrogenation over gold supported on titanium, iron, and zinc oxides 93

Hydrogenation
Participation of support sites in hydrogenation of 1,3-butadiene over Pt/Al_2O_3 catalysts 77
Carbon dioxide and carbon monoxide hydrogenation over gold supported on titanium, iron, and zinc oxides 93
Hydrogen spillover
Toluene disproportionation over NiS/SiO_2–USY hybrid catalysts Effects of spilt-over hydrogen 115
Infrared spectroscopy
Dehydration of sodium hydroxide and lithium hydroxide dispersed over calcium oxide catalysts for the oxidative coupling of methane 219
Kinetic modelling
The role of initiation in oxidative coupling of methane 51
Magnetite (promoted)
Characterization of promoted magnetite using analytical electron microscopy techniques 107
Mechanism
Oxidative dehydrogenation of lower alkanes on vanadium oxide-based catalysts. The present state of the art and outlooks 1
Metal–support interface
Participation of support sites in hydrogenation of 1,3-butadiene over Pt/Al_2O_3 catalysts 77
Methane activation
The role of initiation in oxidative coupling of methane 51
Methane oxidative coupling
Dehydration of sodium hydroxide and lithium hydroxide dispersed over calcium oxide catalysts for the oxidative coupling of methane 219
Methanol synthesis
Carbon dioxide and carbon monoxide hydrogenation over gold supported on titanium, iron, and zinc oxides 93
Nickel molybdate
Effect of alkali metal promoters on nickel molybdate catalysts and its relevance to the selective oxidation of butane 201
Nickel sulfide
Toluene disproportionation over NiS/SiO_2–USY hybrid catalysts Effects of spilt-over hydrogen 115
Oxidation
Chemoselective catalytic oxidation of glycerol with air on platinum metals 165
Oxidative coupling of methane
The role of initiation in oxidative coupling of methane 51
Oxidative dehydrogenation
Oxidative dehydrogenation of lower alkanes on vanadium oxide-based catalysts. The present state of the art and outlooks 1
Effect of alkali metal promoters on nickel molybdate catalysts and its relevance to the selective oxidation of butane 201
Palladium
Chemoselective catalytic oxidation of glycerol with air on platinum metals 165
Partial oxidation
Investigations of catalytic mechanisms for selective propene oxidation in the presence of steam 177
Platinum
Chemoselective catalytic oxidation of glycerol with air on platinum metals 165
Platinum/alumina
Participation of support sites in hydrogenation of 1,3-butadiene over Pt/Al_2O_3 catalysts 77
Platinum dispersion
Participation of support sites in hydrogenation of 1,3-butadiene over Pt/Al_2O_3 catalysts 77
Platinum–tin
Hydrogen interactions and catalytic properties of platinum–tin supported on zinc aluminate 65
Polystyrene
Polystyrene thermodegradation. III. Effect of acidic catalysts on radical formation and volatile product distribution 139
Potassium ferrite
Characterization of promoted magnetite using analytical electron microscopy techniques 107
Pretreatment
Participation of support sites in hydrogenation of 1,3-butadiene over Pt/Al_2O_3 catalysts 77
Propene
Investigations of catalytic mechanisms for selective propene oxidation in the presence of steam 177
Radicals
Polystyrene thermodegradation. III. Effect of acidic catalysts on radical formation and volatile product distribution 139
Rare earth exchange
Catalytic cracking of a Gippsland reduced crude on a rare earth exchanged ultrastable Y zeolite 41
Sb/Sn/V oxide catalyst
Investigations of catalytic mechanisms for selective propene oxidation in the presence of steam 177
Sodium/lithium–calcium oxide
Dehydration of sodium hydroxide and lithium hydroxide dispersed over calcium oxide catalysts for the oxidative coupling of methane 219
Structural change
Dehydration of sodium hydroxide and lithium hydroxide dispersed over calcium oxide catalysts for the oxidative coupling of methane 219

Structure
Oxidative dehydrogenation of lower alkanes on vanadium oxide-based catalysts. The present state of the art and outlooks 1
Toluene disproportionation
Toluene disproportionation over NiS/SiO_2–USY hybrid catalysts Effects of spilt-over hydrogen 115
Ultrastable Y
Catalytic cracking of a Gippsland reduced crude on a rare earth exchanged ultrastable Y zeolite 41
USY zeolite
Toluene disproportionation over NiS/SiO_2–USY hybrid catalysts Effects of spilt-over hydrogen 115
Vanadium oxidation states
XPS studies of the surface oxidation states on vanadium–phosphorus–oxygen (VPO) equilibrated catalysts 125
Vanadium oxide
Oxidative dehydrogenation of lower alkanes on vanadium oxide-based catalysts. The present state of the art and outlooks 1
Vanadium–phosphorus–oxygen
XPS studies of the surface oxidation states on vanadium–phosphorus–oxygen (VPO) equilibrated catalysts 125
Vanadyl-pyrophosphate
XPS studies of the surface oxidation states on vanadium–phosphorus–oxygen (VPO) equilibrated catalysts 125
X-ray photoelectron spectroscopy
XPS studies of the surface oxidation states on vanadium–phosphorus–oxygen (VPO) equilibrated catalysts 125
Y zeolites
Disproportionation of ethylbenzene over deeply dealuminated Y zeolites 157
Zeolites
Catalytic cracking of a Gippsland reduced crude on a rare earth exchanged ultrastable Y zeolite 41
Toluene disproportionation over NiS/SiO_2–USY hybrid catalysts Effects of spilt-over hydrogen 115
Disproportionation of ethylbenzene over deeply dealuminated Y zeolites 157
Zinc aluminate spinel
Hydrogen interactions and catalytic properties of platinum–tin supported on zinc aluminate 65
